

Policy for erection of a Poly Tunnel.

- Any structure on the allotment must be temporary and maintained in safe order with an appropriate external appearance and condition. If the council is not satisfied with the state of the structure the tenant must either repair it to the council's satisfaction or remove the structure within one month of instruction to do so. If structure is not removed, the council may remove it and charge the tenant the full cost of removal and disposal.
- Tenants may apply for 1 poly tunnel in addition to one shed and one green house on their plot. Glass houses and poly-tunnels should cover no more than 20% of the allotment. Permission from Council is required for poly-tunnels with tunnel size and layout agreed to a maximum height of 2 meters.
- Poly-tunnels should be rotated within the allotment site every two years to allow the covered soil to return to its previous natural state.
- Council should be made aware on application how management of installing the installation of drains and gully's run-off water to be diverted into artificial water courses for use as irrigation.
- All structures must be adequately secured to the ground to prevent uplift and kept within at least 1 meter of the boundary of the allotment as to not over shadow their neighbouring plots.
